

Orthopedic Assessment for the upper body

EDMUNDSON Alan

Learn classic assessment techniques for the neck, shoulder and elbow. Lavishly produced and filled with beautiful 3-D animations that show exactly which structures are involved. Alan will walk you through a logical progression of testing that will reveal the underlying pathology with crystal clarity.

Each section is divided into Subjective Assessment, Observation, Tests, Special Tests and Palpation. This includes tests such as passive range-of-motion, active range-of-motion, strength tests, nerve conduction tests, neck facet joint assessment, impingement tests for the rotator cuff, ligament tests and more. 109 total!

You will also learn which questions to ask, and exactly what the answers indicate. Each assessment is clearly demonstrated and explained, so you can quickly apply the techniques to your practice.

Total 2 hrs. Expand your assessment knowledge with this encyclopaedic resource!

Review: "Any healthcare practitioner involved in treating soft-tissue disorders will find these DVD's a wonderful resource to have on hand and very beneficial in helping to treat clients." *Allan Hudson, ATMS News*
